

EXTENDING LEARNING BEYOND THE SCHOOL DAY

CLAYTON READS AND CONTINUES TO LEARN! In our collective commitment to high performance, let's ensure our students continue learning beyond the school day. Fortunately, we have wonderful *standards-based* and *highly engaging* resources that our students can access at home to continue to develop critical knowledge and skills for grade-level mastery. All, please encourage our students to utilize the following online resources to ensure our students are actively engaged in learning. Students use these resources regularly during the school day, so they are already familiar with how to log-in and navigate the system. Schools are encouraged to acknowledge students who use these resources while they are out of school. Essentially, we do not want students to fall behind in their learning.

Please ensure students take full advantage of these online resources (if they have access to the Internet). Parents are asked to establish a schedule throughout the day for regular engagement with these tools. If students do not have Internet access, students are encouraged to read, to write, and to solve something through their day using the available at-home resources.

PERSONALIZED LEARNING RESOURCES THAT CAN BE ACCESS IN THE CCPS PORTAL (Grades K-12)

- CCPS Portal → www.my.clayton.k12.ga.us
 - **iReady Reading and Math Program (Grades K-8)**
 - Provides targeted practice based on students' individual learning needs in reading and mathematics.
 - **Achieve3000 (Grades 9-12)**
 - Provides targeted practice to increase students' reading levels using informational texts. The goal is for students to be reading on or above grade level upon graduation.
 - **STEMSCOPES (Grades K-12)**
 - It is recommended that students complete the STEMscopedia tasks under the Explain tab for the unit of study and download the student handout. The handout provides students with the opportunity to complete multiple tasks as well as provides opportunities for parents to support their child's learning.
 - **Odysseyware (Grades K-12)**
 - This resource provides students with additional practices in developing mathematical competencies in Algebra I, Algebra II, Geometry, and other math courses of study.
